

OmniView Dual-User PRO3 16-Port KVM Switch

The OmniView Dual-User PRO3 USB & PS/2 KVM Switch provides easy and dependable server management by two concurrent administrators. The Switch enables two network administrators to monitor and control up to eight, or 16, USB- and PS/2-platform servers from two different consoles, simultaneously!

Benefits

- Dual-User Connectivity allows 2 administrators to access the KVM Switch simultaneously and communicate with servers connected to the Switch
- USB & PS/2 Connection offers expanded connectivity in a mixed server environment
- Dedicated Daisy-Chain Ports let you easily expand your KVM configuration, without sacrificing available CPU ports
- Hot Keys allow you to easily switch servers using a sequence on your keyboard
- On-Screen Display (OSD) simplifies server management and allows you to assign names and switch to each connected server
- Flash-Upgradeable Firmware ensures compatibility with the latest hardware
- AutoScan lets you scan and monitor the activities of all connected servers
- 1U Design allows for desktop or rack-mountable installation
